SUMMARY

Final-year Informatics student at Telkom University with internship experience in Service Quality Assurance at **Telkomsel**. Hands-on across the SDLC: functional and non-functional testing, full-stack development (Spring Boot, React, FastAPI), and large-scale data processing with Apache Spark.

EDUCATION

Telkom University — Bachelor of Informatics (S1 Informatika) *2022 – Present*

EXPERIENCE

Service Quality Assurance Intern, *Telkomsel* *2025*

- Executed **functional and non-functional testing** on digital applications and IT services, validating behaviour against technical and business requirements.
- Supported Quality Assurance activities across the **Software Development Life Cycle (SDLC)**, from requirement review through release verification.
- Partnered with product and engineering teams to triage defects and confirm fixes, contributing to smoother, lower-defect releases.

PROJECTS

Crypto RSI Heatmap — Real-Time Market Analysis Platform | *Python, FastAPI, React, TypeScript, Tailwind CSS, Binance API, Google Gemini* *2026*

- Built the **FastAPI REST layer** serving multi-timeframe RSI heatmap data (15m to 1w) from the Binance API to a React/TypeScript frontend.
- Integrated a **Google Gemini-powered** fundamental analysis and trading chatbot endpoint, with API-key configuration and rate-limit handling.
- Established the **automated test suite** — pytest with coverage on the backend, Vitest + React Testing Library on the frontend — running through GitHub Actions CI on every push and PR.

Cardiovascular Risk Prediction — Big Data Pipeline | *Apache Spark (PySpark), Spark MLlib, Pandas, Matplotlib, Google Colab* *2026*

- Engineered an end-to-end pipeline over a **70,000-record** medical dataset on Apache Spark, covering cleaning, feature transformation, and distributed model training.
- Trained a **Random Forest classifier** in Spark MLlib to predict cardiovascular risk; produced Matplotlib feature-importance charts identifying dominant clinical risk factors.

Hall of Fame Prototype — GitHub Workflow Simulation (Group 5) | *HTML, CSS, GitHub Issues, Pull Requests, Code Review, Audit* *2025*

- Delivered a website prototype for a **Software Implementation & Testing** course as the assigned programmer in a simulated professional GitHub workflow.
- Resolved a customer issue by restyling the application theme and implementing the approved prototype as a pull request.
- Contributed to a zero-violation audit: **4 issues, 4 pull requests, 4 merges** with clean commit messages.

Autonomous Monitoring Bot — IoT Automation ***(private repository)*** | *Python, Telegram Bot API, IoT device integration* *2025*

- Co-developed a Telegram-based bot connecting to IoT devices for real-time status reporting and remote automation commands.
- Handled message parsing and alert routing so operators receive actionable notifications, not raw sensor streams.

Full-Stack Web Application — Object-Oriented Programming Project ***(private repository)*** | *Java Spring Boot, React.js, Tailwind CSS, MySQL* *2025*

- Built a full-stack application with a **Spring Boot** backend, a **React.js + Tailwind CSS** frontend, and MySQL for persistent storage.
- Modelled the relational schema and implemented CRUD flows end to end, from controller to UI.

PUBLICATIONS

P. S. Krisnaputra et al., "Multimodal Cyberbullying Detection on Platform X Using VGG16 Features and Hybrid CNN-BiLSTM with GloVe Feature Expansion", *submitted for review*, 2026.

- First author. Built a Hybrid CNN-BiLSTM text branch (TF-IDF + GloVe) with a VGG16 image branch over **45,404 labeled Indonesian posts**.
- Late fusion raised accuracy to **84.46%** (+0.82%), verified with McNemar's test on 4,542 posts.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, Go, SQL, HTML/CSS

Backend & Data: Spring Boot, FastAPI, Apache Spark (PySpark), Spark MLlib, MySQL, Pandas

Frontend: React.js, Tailwind CSS, REST API integration

QA & Testing: Functional & Non-Functional Testing, SDLC, pytest, Vitest, GitHub Actions CI

Tools: Git & GitHub, Google Colab, Jupyter, Figma, Postman

CERTIFICATIONS

- IBM Big Data 101 — Cognitive Class, 2026
- Full-Stack Web Development — Udemy
- Figma UI/UX Design Essentials — Udemy
- Fundamentals of Digital Marketing — Google
- Entrepreneurship International — Tel-U Career
